

20 Ton MicroChiller

Ronatec 20 Ton MicroChiller

- 20 HP Industrial Water Chiller
- 45,360 Kcal/h Cooling Capacity
- Dual Compressor
- 53 Gal Large Tank
- LED Display

Details

- **Powerful Cooling Performance:** Built with dual 20 HP Panasonic compressors, this air cooled water chiller delivers a 45,360 Kcal/h cooling capacity with easy maintenance and long service life. Note: Designed for water cooling, not air conditioning.
- **Comprehensive Six Protections:** Stay secure with phase loss/reversal, motor overload, high/low pressure, auto water refill, and anti-freeze protections. Paired with high/low pressure gauges, this industrial water chiller ensures reliable operation.
- **Excellent Heat Dissipation:** Built with aluminum film microchannel technology, our air-cooled industrial chiller delivers high cooling efficiency. Tip: Regularly clean the microchannel surface with an air gun for optimal performance.
- **Smart LED Control Panel:** The intuitive LED display provides real-time status updates and easy operation. With a wide 5°C to 30°C temperature range, this industrial water cooler is tailored for a variety of working environments.
- **Built for Industrial Versatility:** Ideal for injection molding, thermoforming, waterjet cutting, metal fabrication, welding, MRI, laser systems, imaging, and food & beverage industries. Four caster wheels ensure smooth mobility wherever you need it.
- **Note:** Not recommended for high-salt or highly acidic/alkaline environments.
